

SMS is now an integral part of the communication network

SMSport is another communication channel that together with email, fax, and phone will enhance your productivity with real-time information.

SMSport extends the Short Message Service (SMS) concept to enterprises, their customers and suppliers.

It enables Enterprise applications to send and receive messages to and from mobile phones and desktops; a user can send SMS messages from Outlook the same way as e-mail. SMSport can be configured to send and receive SMS messages via cellular modems that are connected to the server COM ports or to the Internet. SMSport can also be connected directly to cellular service providers or service aggregators.

SMS is not just for fun anymore...

Equip Your Employees With a Competitive Advantage

Information access is critical to business success. SMSport enables enterprises to give their mobile workers access to critical business information through instant alerts via SMS to any mobile phone:

- E-mail alerts
- Appointment alerts
- Contact information retrieval
- Order receipt notification
- Outage alerts
- Price change alerts
- Emergency alerts

Extend Customer and Supplier Relationships with Interactive SMS Applications

SMS is ubiquitous and its enormous growth of traffic is a key indication of its almost universal adoption. Businesses have recognized the potential of this innovative medium to deliver new services to extend and cement customer & supplier relationships:

- Account balance
- Promotions
- Itinerary changes
- Appointment reminders
- Overdraft alerts
- Threshold reminders
- Policy renewal notification/confirmation
- Service locator

SMSport Means Secure Access

SMSport gives employees secure access to their business applications such as e-mail, calendar, contacts and the corporate database. SMSport provides the infrastructure, the applications and the interfaces needed, however, it's device independent. SMSport ensures the integrity of sensitive corporate data as if it had never left the secured environment; therefore, SMSport employs a high and efficient degree of encryption security.

Any enterprise employing mobile professionals, salespeople, service people, consultants or traveling executives needs SMSport.

The simplest, lightest & most effective means of keeping in touch with your office

For more information please contact your local rep:

Or look us up at
www.faxport.com for a reseller in your area.

By providing rapid access to the corporate intranet and office applications, SMSport improves services, working methods and business efficiency.

E-mail From Anywhere

Complete access to e-mail including e-mail alerts throughout the day.

Scheduling on-the-fly

Daily schedule and notifications of any changes directly to the mobile device. You can also add and amend appointments yourself via your mobile device.

GAL Lookup – Contacts Made Easy

Access the corporate directory, or your personal address book, from your mobile device. You can initiate a call or create e-mail without having to key-in the details.

Customer Response and QOS

Direct access to back-office data, so you can check details such as order status, prices and discounts on the fly.

Work Efficiency

SMSport enables you keep abreast of changing situations and maintain a proactive role when on the road.

True mobility

Gives you the freedom to access your business applications from any place at any time.

Print your messages when you are on the road

Powered by FAXport, SMSport offers the wireless user a comprehensive printing solution from the wireless device to any fax machine.
